33. (Canceled). (Canceled). 35, (Canceled). 36. (Canceled). 37. (Canceled). 38. (Canceled). 39. (Canceled). 40. (Canceled). 41. (Canceled). 42. (Canceled). 43. (Canceled). 44, (Canceled). 45. (Canceled). A method of operating an information storage system comprising: 46. (Amended Herein) positioning a read head to a first position where no user data is stored proximate a storage medium; comparing a value of an evaluation parameter to a predetermined level; and initiating a head cleaning when the evaluation parameter exceeds the predetermined level.

exceeds the predetermined level.

RESPONSE TO OFFICE ACTION New Atty. Docket No. P0818 (Old Atty, Docket No.: 067470.0164)

Serial No.:10/718,341 Filed: Nov. 20, 2004

- 47 (Previously Added) The method of Claim 46, further comprising repositioning the read head to the first position after head cleaning and redetecting the value of the evaluation parameter.
 - 48. (Previously Added) The method of Claim 46, wherein the first position is on a loading track.
- 49. (Previously Addcd) The method of Claim 46, wherein the evaluation parameter is a position error signal.
 - 50. (Previously Added) The method of Claim 46, wherein the evaluation parameter is fly height.
 - 51. (Previously Added) The method of Claim 46, further comprising:

 positioning the read head to a second position over a reserved track when the evaluation

 parameter does not exceed the predetermined level;

 comparing a value of a second evaluation parameter to a predetermined level; and

 parking the read head and generating an error condition when the second evaluation parameter
- 52. (Previously Added) The method of Claim 51, further comprising moving the read head for normal operation when the second evaluation parameter does not exceed the predetermined level.
- 53. (Previously Added) The method of Claim 51, wherein the second evaluation parameter is the soft error rate.
